# WHY

Section 1.1 of the National Fire Code of Canada and all Provincial Codes make the building owner or his agent responsible for Fire Safety Code compliance.

Routine fire prevention assessments assure a high level of building and tenant safety.

Fire Prevention is inexpensive preventative maintenance.

Regular Assessment of Fire Safety Code compliance is a sound asset protection strategy.

FireWise
CONSULTING
LEARNING ACADEMY

Building owner-managers learn how engineered fire protection systems are designed to protect the building by detecting fire, alerting occupants, and preventing the spread of fire.

Direct involvement of the building owner-manager in fire prevention yields other safety, and maintenance benefits.

Regular Fire Safety Code compliance assessments provides tenant education opportunities and demonstrates commitment to safety, building trust.

# WHAT

# HOW

Qualified owner-managers use a pre-designed mobile app as a checklist to ensure all required systems and features are code compliant.

Any deficiencies noted are flagged for corrective action.

Completed form is submitted to Fire Department in approved format.

Self-assessment audit will establish a relationship of trust and goodwill with the Fire Department.
