

Continuing Education for Fire Investigators

COURSE DETAILS

This program is designed for fire investigators looking to stay up to date with evolving standards and investigative techniques while strengthening their technical expertise. Participants gain practical insights into emerging technologies and best practices that support accurate fire scene analysis and improve public safety outcomes. The program also provides Continuing Education (CE) hours to support certification or licence renewal.

Who should take this course?

Those wishing to improve their training in fire investigation, improve their service and earn CE hours required for certification and licence renewal.

Curriculum

Each course aligns with NFPA standards and follows a four-year cycle, allowing participants to resume at any point.

Year 1: Fire Science of Fire Investigators, Building Constructions & Systems, Fire Effects and Patterns, Legal Considerations for Fire Investigators.

Year 2: Safety, Building Electrical & Fuel Gas Systems, Examining the Fire Scene, Identification, Collection & Preservation of Physical Evidence, Data Collections Outside of the Fire Scene.

Year 3: Documenting the Fire Scene, Complex Investigations, Determining the Origin, Cause Determination.

Year 4: Analyzing the Incident, Explosions, Automobile, Marine & Equipment Fires, Wildland Fires.

Earn Continuing Education Hours

Qualify for license renewal, expert designations, and certifications with CE hours.

Prerequisites

None.
